## Finaldata Enterprise 3.0 Torrent

The majority of the reports generated by Torrent are processed within 30 days of receipt of the sample. Reports that are complicated, (requiring multiple dilutions or specific findings) may have a longer turn-around time. Please contact our Project Managers for more details. A sample report in Torrent is a portion of our service that is in the form of a Quick Access Questionnaire (QAQ). The QAQ is a report designed to be used as a quick checklist to verify whether the conditions of a lab test are followed with a high level of confidence in the quality and accuracy of the measurement. The QAQ does not contain a detailed chain of custody form but it does have a short checklist so you can use it as a quick check on whether the QAQ was created and the requirements were met. The QAQ checklist was developed and is maintained by Torrent. However, we use this checklist as a guide for our own checks for data quality. The major objectives of using a checklist is to (a) check whether the QAQ was created and (b) see if we followed the procedure. If the QAQ checklist is not followed properly, we will find out from you about the failure to adhere to the required procedures. We will then investigate why the sample was returned with problems. PLEASE NOTE: This function is not available to be used through the Geotracker system. We are working with Torrent to provide this function for the Geotracker system in the future. This is a function from our Error Reporting section. When opening this function, we must require the 'Public Emails' setting on the Geotracker System Settings and an Outbound Emails Settings must be set under the Configure Outbound Emails tab in the Geotracker System Settings page. The Outbound Emails Settings page for Geotracker requests, "Public Emails" and "Outbound Emails". To add a new email address, please use the "Manage New Email Addresses" function in the Addresses section. Email addresses added here are used to send all error reports received from any unknown sources and are located in the Global ID area.
